## Threads upside down

Posted by davidn87 - 2007/11/27 13:33

---

How do I change the view so I see the first post in a topic at the top of page 1 instead of at the bottom on the last page?

Go to "Your Scotsgait Profile" -> "Edit" -> "Update Your Profile" -> "Fireboard" -> "Post Order"

---

I tried both options on that but it's still the same.

Same with me.

I tried it several times and it stays the same. :unsure:

I was ok untill i just tried to sort it out.now i am in the same position as you lot.ho hum

must admit i am getting more frustated with this board as time goes on..

This is probably one of the reasons that it is so quiet

Think i`ll give it a miss for a while

I don't understand, TL. I've checked your back-end profiles (!! ) and they show that you should have the posts in the correct order - oldest at the top of the page, newest at the end.

If you've just tried changing the layout through your profile, I'd suggest logging out then logging in again so that the changes take effect.

I've made a slight change elsewhere and it's apparently working now. If you have any more problems, please PM me.

It appears to be sorted at last :woohoo: B)

Now all I have to do is find enough time to post here :laugh: ;)

That's another one under my belt anyway!:P

One thing I noticed it is now doing (sorry to be a pest) but I think it is a wee point that will annoy.

When you post it takes you to your post in most forums, but here it takes you to the start of the thread (where your post would be if it was newest first) and not to the end of the thread where it is when set for Newest last (which I prefer and have it set for).

Just letting you know! :)

Thanks, BoB. I'll see if I can find out how do to change that.
