
Photo Gallery

Posted by admin - 2007/07/24 20:16

A Photo Gallery has now been added to Scotsgait from the photo gallery menu item.

The easiest way to upload photos is from your profile. Go to your profile and to the Gallery tab. There is an option there to upload from your Gallery User Panel.

In the User Panel, click on the "New Picture" button.

Give the photo(s) a title and choose an appropriate category from the drop-down menu.

Browse to the location of the original photo on your computer (or camera/phone if attached)

You do not need to delete the original after uploading (even if you did, it would remain on your computer !). Deleting prevents the copy of the original to pop up from the thumbnail.

If you have an animated file (although it's unlikely for the photo gallery), you should tick the last box.

Press "Upload", and that's it on its way.
