---

At last, his honorary degree from Edinburgh has been withdrawn and I can no longer be remotely associated with him !

It was a disgrace to Edinburgh University that the vile beast was ever given an honorary degree in the first place. It was well known at the time that he was responsible for hundreds of murders in Matabeleland. In the intervening years he has shown himself to be one of the most perverted and murderous dictators that even the benighted continent of Africa has produced. Zimbabwe's people are starving. The once prosperous country's corpse is being picked over by rapacious Chinese criminals who are bribing the fat baboons of Mugabe's family and Zanu PF to give up the mineral resources that remain.

Why did it take the University so long to remove this discredited honor from this appalling man?

The brutalised and starving of Zimbabwe are asking the more relevant question, "why is no-one coming to alleviate their desperate needs."
