<http://news.bbc.co.uk/1/hi/health/7561293.stm>

can i just throw this out there.. no offense to bottle fed babies.:blush:

Could formula have any possible link to this? When did formula take off and is there a link with the obesity surge with it?

Just wondering.

Did we use to have so many infants with weight problems before the formula? And tubal ligations.. and gassie meds.. etc.. Ive seen parents..with the gassie meds.. as a first all, end all... Im just curious.
