
Lenin\'s Birthday Tribute

Posted by TLJ - 2008/09/06 15:08

As seen from Google Earth

The message, which translates as "Lenin is 100", was cut into a forest in a remote region of Siberia. Each letter is around 80 metres high, and the entire message stretches for 600 metres.

It was created by Russian woodcutters in 1970 to mark the centenary of the Communist leader's birth.
